

KEN ISAAC

Lead SDET | Automation and Functional Testing | 9+ Years

Chennai, India | +91 97908 33255 | kenisaac.d@gmail.com | <https://www.linkedin.com/in/kid>

PROFESSIONAL SUMMARY

Lead SDET with 9+ years of experience driving automation and functional quality across FinTech SaaS, finance ERP, e-commerce, and enterprise platforms. Built and maintained UI, API, and mobile automation frameworks using Playwright/TypeScript, Selenium/Java, Cucumber, Appium, and Postman/Newman, improving regression coverage and reducing manual execution effort per release. Experienced in CI/CD pipeline integration, test strategy, stakeholder reporting, release sign-off, and mentoring QA engineers.

CORE SKILLS

Automation: Selenium WebDriver, Playwright, Cucumber, Appium, Leapwork, Page Object Model, Data Driven Frameworks

Programming: Java, JavaScript, TypeScript

API Testing: REST APIs, Postman, Newman, Swagger, API web services testing

Testing Types: Functional, Regression, Smoke, Sanity, Integration, End-to-End, Mobile Application, Cross-Browser Testing

Test Management: Jira, TestRail, qTest, Confluence, Test Plans, Requirement Traceability Matrix

Methods and Tools: Agile, Scrum, Git, Figma, defect reporting, test estimation, stakeholder communication

PROFESSIONAL EXPERIENCE

Lead SDET | STITCH | Feb 2026 - Present

- Drive automation and functional quality strategy for secure, scalable FinTech SaaS web and mobile applications.
- Maintain and optimize scalable Playwright + Cucumber automation frameworks for high-priority user journeys and regression coverage.
- Designed and implemented a reusable, scalable Appium + Cucumber hybrid mobile automation framework for Android and iOS platforms.
- Own and lead QA/SDET activities, manage testing priorities, mentor team members, review automation deliverables, and drive quality best practices across functional, API, and mobile testing.
- Collaborate with product and engineering teams to review requirements, define test scenarios, assess automation feasibility, and support release readiness.

Senior SDET | WPP | May 2025 - Feb 2026

- Delivered QA for finance ERP modules including Accounts Payable, Accounts Receivable, General Ledger, Procurement, Expenses, Cash Management, and Payments.
- Partnered with business analysts to gather requirements and identify test scenarios suitable for automation.
- Performed functional testing for new features across multiple browsers, mobile devices, and desktop environments.
- Automated new user stories using Selenium WebDriver and Leapwork.
- Validated REST endpoints, built Postman/Newman API automation, and integrated automated checks into the delivery pipeline.
- Owned QA planning and execution for finance ERP modules, managed task allocation, mentored team members on test design and automation feasibility, and supported release readiness decisions.
- Coordinated project testing status with the CoE team, senior management, stakeholders, and performance testing teams before release approvals.

Senior Consultant | CDW Technologies (formerly Sirius Computer Solutions) | Apr 2017 - Apr 2025

- Led manual and automation testing for high-performance web applications and API web services across e-commerce and finance domains.
- Designed and built reusable Selenium/Java and Playwright/TypeScript automation frameworks from scratch, enabling faster regression execution and scalable test coverage across multiple product modules.
- Owned end-to-end QA activities including resource allocation, estimation, test execution, defect reporting, test closure, and sign-off.
- Prepared and executed detailed test cases for functional, regression, smoke, sanity, integration, end-to-end, mobile, and API testing.
- Developed API automation with Postman/Newman and supported repeatable regression validation for product releases.
- Mentored QA engineers on quality assurance practices, test design, automation feasibility, and defect lifecycle management.
- Participated in sprint planning, design reviews, and backlog refinement sessions, providing input on testability, test cases, and automation scope.
- Collaborated daily with product developers, team leads, and project managers to resolve defects and support timely software releases.

EDUCATION

Bachelor of Computer Science and Engineering | Anna University, Chennai | Aug 2010 - Apr 2014
